## **INFO :**

With 1 whole year of delay - producer Andi Jung suffered from a dangerous allergic reaction and poisoning in spring 2005, all recordings had to be stopped - comes the ENGLISH (international) album of TERRORGRUPPE : "Rust In Pieces".

11 of the 13 Songs are english versions of the (german) album "Fundamental" / Destiny 2003 , new english vocals have been recorded over those basic-tracks (same procedure as a "riddim" in the world of authentic reggae-music)

The result was a bundle of completely new and unique songs , with new contents , new arrangements and mostly new melodies and vocal-harmonies.

"Rust In Pieces" is a true proof for the lasting and outstanding quality of these 4 krautboys, showing the international scene TERRORGRUPPE have always been playin' in the same league as all the big names from California, England or Scandinavia... but with a very own sense of black humor and offensive irony.

"Rust In Pieces" is the 3<sup>rd</sup> international release of TERRORGRUPPE, the follow-up of "Music For Assholes (USA, Canada, Japan, Eastern Europe 1997) and "1 World – 0 Future" (Europe & Southern America 2000)

In November 2005, right after the last recordings for this album, singer Archi Alert left the Band, surprisingly.
